ADVENTURE CLR EARTH COLLECTION

Updated for 2023, created with a combination of single-use plastic and surplus fabric to prevent wastage, the Adventure CLR Collection continues Vango's ambition to develop a range with the environment in mind.

Your favourite adventure tents, such as the Alpha and Beta have been updated with Protex® Zero Fabric, providing a strong shelter against the elements whilst you enjoy the outdoors.

Protex® Zero Fabric

Our new Protex® Zero Fabric has been designed to reduce waste by utilising offcut and surplus trim fabric and 70D polyester made from single-use plastics. Designed to protect you from the elements whilst ensuring we can enjoy the great outdoors and do our best to protect it.

70D Polyester - Lightweight and strong

Fully Factory Taped Seams - For complete protection

Fire retardant - ISO5912* compliant

3000mm HH - Fully waterproof

COLOURLOCK™ - Aids colour retention from UV light

***ISO6941** - All Vango tents are designed to the stringent international standards of ISO6941, which specifies requirements on safety, performance, rain resistance and fitness for use.

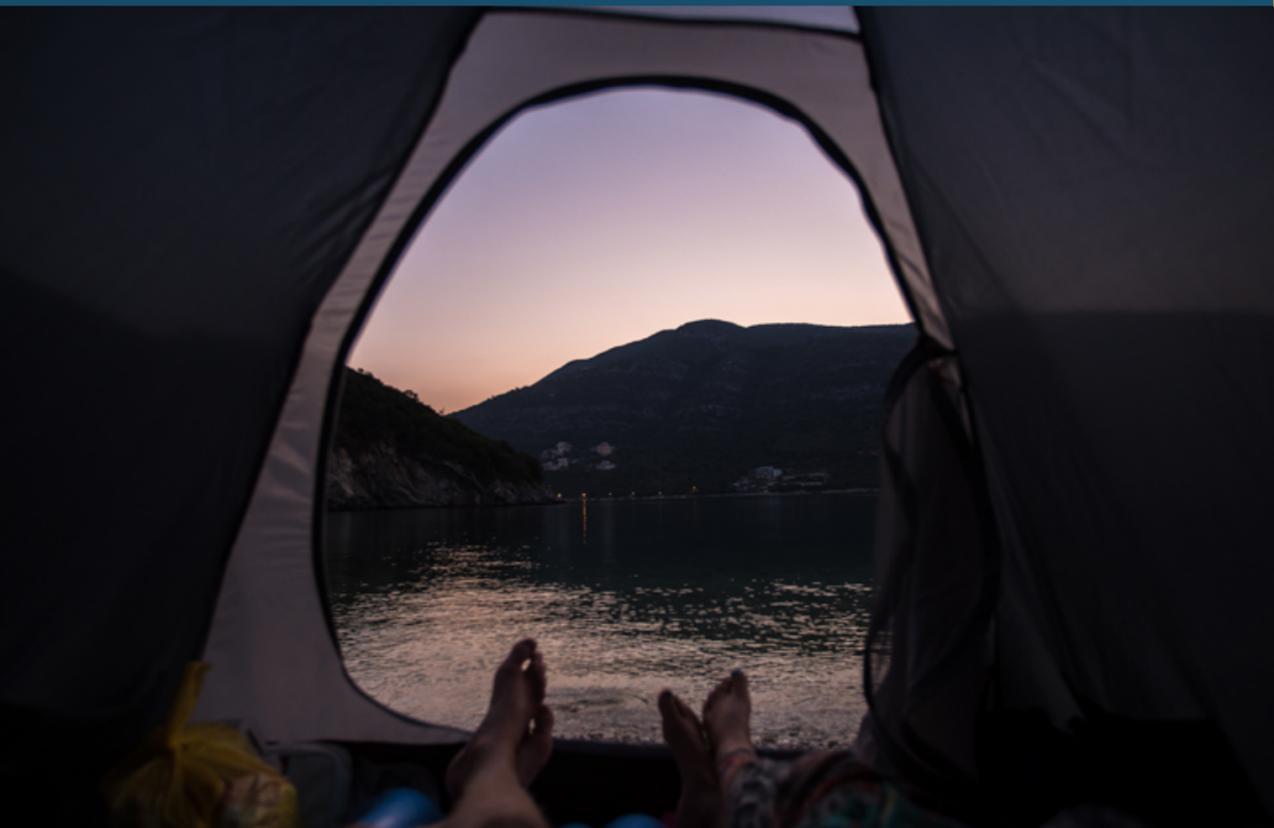

Vango PowerFlex® Fibreglass Poles

Our pre-angled fibreglass poles are strong, reliable, and easy to erect, achieving greater internal space than a standard curve.

Linked-in Waterproof PE Groundsheet

Benefiting from a robust and hardwearing polyethylene fabric to stand up to the rigours of the most active campers. Our range of Adventure CLR tents also feature a linked-in groundsheet which can be detached from the living area, you simply roll it under the bedroom when not required.

Nightfall Bedrooms

Our Adventure CLR Collection benefit from Nightfall Bedrooms to help reduce early morning light, so your sleeping pattern is not dictated by the sunrise.
